ABOUT ME

A passionate Front-end UI Developer with 7+ years of experience building responsive websites using ReactJS (with Redux/Hooks), HTML5, and CSS (TailwindCSS, Bootstrap). Skilled in creating user-friendly interfaces and experienced in back-end development with Laravel and WordPress customization. Dedicated to delivering high-quality, performance-driven web solutions. Working on Trello, Jira, Productive.

WORK EXPERIENCE

Front-End Developer

Square1 | August 2019 - Present

Developing and maintaining websites using a variety of technologies, including CMS platforms like WordPress (with Elementor), PHP, VueJS, and Laravel (Blade Templates). Proficient in leveraging tools such as Composer for dependency management, Homestead for local development environments, and modern CSS frameworks like TailwindCSS and Bootstrap to deliver efficient and scalable web solutions.

- [UXDI](#) | Redesign in Laravel + TailwindCSS
- [Digital Learning Institute](#) | Laravel (Blade templates) + TailwindCSS + Livewire

Intermediate Layout Programmer

Teravision Technologies | August 2014 - July 2019

Designing, developing, and maintaining websites using CMS platforms like WordPress, alongside PHP and ReactJS. Additionally, contributed to mobile development projects using XCode, implementing Auto Layout techniques in Interface Builder with Swift and Objective-C to ensure responsive and user-friendly interfaces.

- [Focalyx iOS](#) | XCode using Auto Layout Techniques in Interface builder
- [Antique Homes](#) | Created in WordPress + Bootstrap

Web Developer

Oruga Studio | June 2010 - July 2014

Developing and maintaining web projects using CMS platforms like Joomla and WordPress, alongside PHP and MySQL for back-end functionality. Proficient in front-end technologies such as HTML5, CSS3, JavaScript, Ajax, and jQuery to create dynamic, responsive, and user-friendly web applications.
