ABOUT ME

Passionate **Front-end Developer** with over 10 years of experience specializing in high-performance, responsive websites and scalable web applications. Proven expertise in crafting pixel-perfect and responsive designs using CSS (TailwindCSS, Bootstrap, BEM, Material UI, Grid, Flexbox), and JavaScript (AlpineJS, Vue.js). Highly proficient in integrating with robust backend technologies such as Laravel (PHP) and WordPress (ACF, Elementor), ensuring seamless functionality and a superior user experience. A collaborative problem-solver dedicated to quality and continuous learning.

WORK EXPERIENCE

Front-end Software Engineer

Square1 | August 2019 - Present (Remote - Dublin, Ireland)

- Spearheaded the development and maintenance of complex websites, including custom WordPress themes from scratch and leveraging frameworks like Laravel (Blade Templates, Nova) and WordPress (Elementor, ACF) to deliver high-performance solutions.
- Optimized development workflows by implementing Composer and Homestead/Docker, which improved efficiency and team collaboration.
- Architected dynamic user interfaces with Vue.js to deliver seamless and engaging user experiences.
- Expertly implemented and customized TailwindCSS and Bootstrap to create responsive, aesthetically pleasing, and scalable web solutions.
- [UXDI](#) | Laravel + TailwindCSS
- [Venturewave Capital](#) | WordPress theme using Elementor based on Figma designs.
- [Digital Learning Institute](#) | Built dynamic interfaces using Laravel (Blade templates), TailwindCSS, and Livewire.
- [CanavanByrne](#) | Integrated multiple front-end technologies including TailwindCSS, AlpineJS, and VueJS within a Laravel.

Intermediate Layout Programmer

Teravision Technologies | August 2014 - July 2019
(Caracas, Venezuela)

- Developed bespoke, high-performance websites on CMS platforms like WordPress, aligning with client requirements for optimal technological solutions. Focused on exceptional accessibility, intuitive navigation, and superior user experience (UX) with modern standards, including HTML5 and responsive design.
- Analyzed, architected, and constructed robust software solutions using PHP and ReactJS. Contributed to mobile development projects via Xcode, implementing Auto Layout with Swift and Objective-C for responsive interfaces.
- [Focalyx iOS](#) | XCode using Auto Layout Techniques.
- [Antique Homes](#) | Created in WordPress + Bootstrap.

Web Developer

Oruga Studio | June 2010 - July 2014 (Caracas, Venezuela)

- Developing and maintaining web projects using CMS platforms like Joomla and WordPress, alongside PHP and MySQL for back-end functionality. Proficient in front-end technologies such as HTML5, CSS3, JavaScript, Ajax, and jQuery to create dynamic, responsive, and user-friendly web applications.
- [ElEstimulo.com](#) | Old site
 - [SuperXtra](#) | Created in WordPress

Web Assembler

E4GS | Jan 2009 - July 2010 (Caracas, Venezuela)

Develop websites on CMS (Joomla), quality control, support and security, managing Google Apps Services.
